

Impinj M800 series-based labels

Impinj M800 series tag chips are designed to be a universal solution for Walmart compliance. They are available in two configurations to match your needs:

- **Impinj M830:** 128-bit EPC memory for standard retail applications
- **Impinj M850:** 96-bit EPC memory + 32-bit user memory when additional item data storage is required

Ready to get started? Ask your packaging provider about these ARC-approved M800-based labels:
